Orlando, Florida

DETACH AND MAIL

“PLAY GOLF at the University of Florida Proton Therapy Institute’s 8th Annual Central Florida Golf Classic, and join in the FIGHT against CANCER.”

The University of Florida Proton Therapy Institute (UFPTI) is committed to improving the outcomes of cancer patients through proton therapy: a new weapon in the battle against cancer—one that is more precise, one that will cause fewer side effects, one that will be more effective, and one that will provide cancer patients with a better quality of life.

Protons, in contrast to conventional x-ray based radiation therapy, deposit less radiation dose in healthy tissues, thus causing less damage to critical normal tissues. This allows us to increase doses to tumors which not only offers the hope of less toxicity, but also higher cure rates.

Two of the missions of UFPTI are to provide the best possible treatment to cancer patients and to define, through research, the best roles and methods for proton therapy. Using these missions UFPTI, since its opening in 2006, has already delivered more than 95,000 proton treatments to more than 2800 patients from the US and abroad. Among the patients benefitting already from proton therapy are those with prostate cancer, pediatric malignancies, sarcomas, Hodgkin’s lymphoma, lung cancer, pancreatic cancer, head and neck and brain tumors. Almost 98% of our patients have been treated on protocols that will generate evidence of the benefits of proton therapy and help to guide improvements in treatment techniques as well as the development of better technology to treat cancer.

The University of Florida Proton Therapy Institute is committed to improving the outcomes of cancer patients! Through research, better proton therapy technology will be developed, better proton therapy techniques will be defined, and new applications for proton therapy will be discovered. By playing in this tournament, you will be supporting proton therapy research and helping cancer patients both now and in the future.

- Nancy Price Mendenhall, M.D.

Medical Director of the UF Proton Therapy Institute
